

## Toad Intelligence Central

Improve productivity, collaboration and data provisioning.

Increase collaboration and streamline data sharing with Toad Intelligence Central. It provides a centralized repository for accurate, up-to-date information; this makes data provisioning more efficient, improving productivity.

Data gathered by Quest's Toad Data Point can be published directly to Toad Intelligence Central. This makes it quick and easy to share and view queries, files, objects and datasets with other team members right within the tool — eliminating the need to email spreadsheets that quickly become out of date.

And users and team members no longer have to worry about reporting failures and data loss from a single person. You can minimize risk by publishing and storing your data in Toad Intelligence Central in a variety of ways, including views that are automatically updated, snapshots of data that are refreshed on a scheduled basis, and static datasets.

Toad Intelligence Central is a server-side software component with an easy-to-use administration console. It's simple to install, runs on a desktop or commodity hardware, and doesn't require technical expertise to manage or administer. IT and data administrators can ensure data governance and require authentication prior to granting access to published data. And because it runs on a server, you can leverage Toad Data Point's automation capabilities to schedule and run automated reports from a fault-tolerant 24x7 server.

### FEATURES

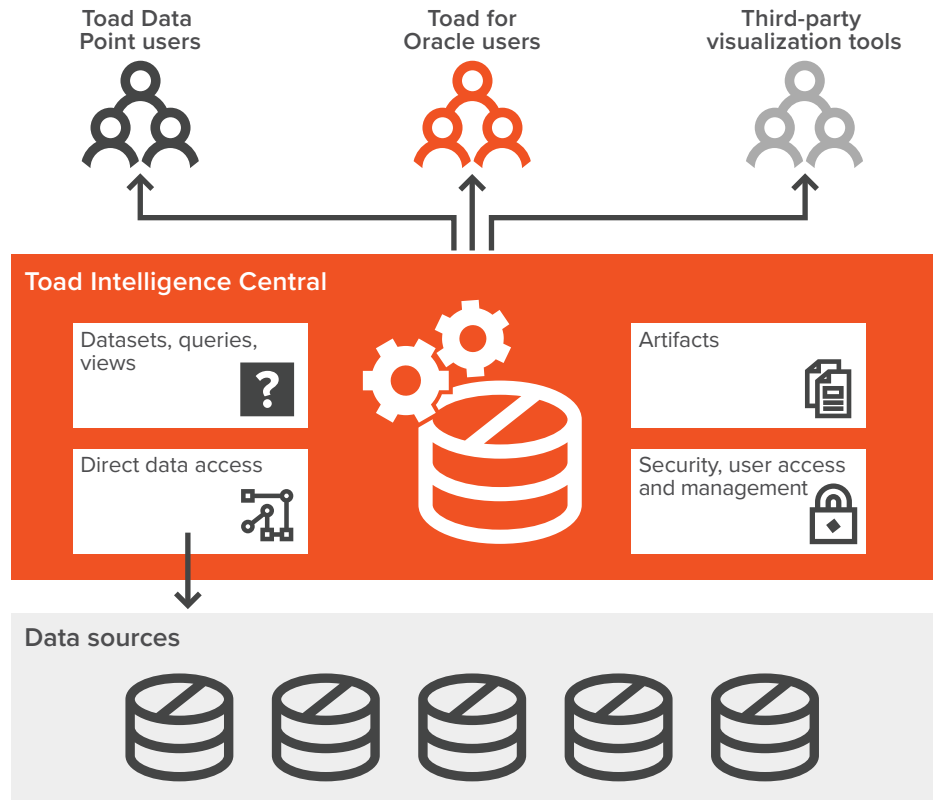

- **Centralized data access** — Gain a single point of access to all your data.
- **SQL views** — Access data directly from the source through SQL rather than moving data.
- **Data repository** — Store datasets or snapshots and schedule regular updates.
- **Data visualization integration** — Connect and share data with users of third-party tools like Microsoft®, Tableau®, Qlikview® and Spotfire®.

Share and view queries, files, objects and datasets with other team members right within the tool.

### BENEFITS:

- Improve team collaboration and knowledge retention
- Reduce the risk of workflow failures
- Increase productivity
- Provision data efficiently
- Set up and administer this solution with ease
- Connect to DBMS, Hadoop®, Salesforce®, Google Analytics®, BusinessObjects®, Oracle® Business Intelligence Enterprise Edition, data warehouses and more

## SYSTEM REQUIREMENTS

### SOFTWARE

Microsoft® Windows® 8.1, Windows 7 (32-bit and 64-bit), Windows Server 2012 (64-bit), Windows Server 2008 R2 (64-bit) and Windows Server 2008 (64-bit)

### HARDWARE

Server can be installed on desktops or commodity hardware. Dependent on number of active and connected users.

Please see the release notes for a full list of system requirements.

With Toad Intelligence Central, business users and data experts can easily collaborate and share data.

- **Artifact publishing** — Share all Toad artifacts — including diagrams, visual queries, automation, SQL files, and more — with other Toad users.
- **Rights management and data governance** — Manage permissions and access rights to shared resources and uphold data governance rules.
- **Active Directory support** — Enable administrators to better manage users and teams with the tool's simplified administration, which makes it easier to add and remove users and to create logins.
- **Automation scripts** — Create automation scripts in Toad Data Point and publish them to Toad Intelligence Central, where they can be scheduled for execution.

### ABOUT QUEST®

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest solutions are scalable, affordable and simple-to-use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.

Toad Intelligence Central is a complementary administration and server component to Toad Data Point, and it is compatible with Toad Data Point, Toad for Oracle, Toad Data Modeler, Toad for SAP and Toad for DB2. Toad Intelligence Central can be used with these analytic tools as a platform for sharing data and reports.
